Greetings,

It is my pleasure to recognize SAIHAM TOWER as having been precertified at the platinum level under the LEED® for Core & Shell Development program. Enclosed you will find a precertification certificate.

Precertification is a unique aspect of the LEED program. USGBC formally recognizes that SAIHAM TOWER has established a goal to develop a LEED Core & Shell building by submitting documentation that reflects a realistic set of project goals and intentions to incorporate green features. Precertification offers a unique value to the Owner/Developer to be able to promote these proposed green features of the core and shell building.

Please accept my congratulations on the LEED Core & Shell precertification of SAIHAM TOWER. It is my sincere hope that this project serves as a model for future high performance green speculative development.

Sincerely,

S. Richard Fedrizzi  
President, CEO & Founding Chairman  
U.S. Green Building Council
